EXPERIENCE

Megafy

Appian Process Developer / 2024 -

Experience in developing comprehensive solutions with Appian to optimize business processes across various industries. Worked with multiple clients to design, implement, and maintain customized enterprise applications, ensuring efficient, scalable solutions that meet business objectives. Focused on process automation, data management, and continuous improvement, delivering flexible platforms tailored to each client's specific needs.

STACK

Appian - SQL - HTML5/CSS3/Scss - Scrum

Frogmi

Front-end Developer / 2021 - 2023

At Frogmi, I spearheaded the design, tech stack definition, and development of version 2.0 of the retail management platform. Prioritizing scalability and performance, I leveraged AWS Amplify, PostgreSQL, Svelte/Svelte-kit, and Redux for user authentication, role assignment, modular interface development, and state management. Implemented Jest, Vitest for unit testing, and Cypress for end-to-end testing to ensure code quality and system functionality. My role was pivotal in delivering a robust, high-performance retail solution tailored to industry needs.

STACK

Svelte 3/Svelte-kit - JavaScript - Typescript - HTML5/CSS3/Scss - Vite - Carbon components - Redux - AWS Amplify - Vitest - Cypress - Yarn - Font-awesome - Scrum - PostgreSQL

Option SpA.
